

DESCRIPTION

Atlas EnergyShield® CGF is a high performance thermal insulation board composed of a closed cell polyisocyanurate foam core with coated glass-mat facers on both sides.

APPLICATIONS

Provides continuous insulation for residential, multi-family and light commercial construction

- Exterior framed walls with wood or steel studs
- Exterior or interior insulation for masonry or concrete wall systems
- Exterior framed walls with or without sheathing
- Interior insulation behind a thermal barrier for stud walls
- Attics and crawlspaces without requiring a thermal barrier
- Air and water resistive barrier when installed accordingly
